

Progression to A Level Physical Education at Prior Pursglove College

A good topic to start with and to provide lots of research opportunities is the use of technology in sport. I have attached a couple of videos to get you started but there are lots available looking at the use of technology for performers, facilities, training, spectators and officials.

What I would like you to do is to produce a poster based on how technology is changing sport, in relation to how it is helping elite performers perform better, how it is allowing people to train and take part in sport more, e.g. floodlights, astro-turf pitches and increased accessibility for disabled performers, how technology is increasing the enjoyment of spectators, through the use of large screens, slow motion etc and finally how technology is helping officials through the use of TMO and VAR etc. As long as you have touched on each of these topics, the examples and amount of research done is up to you. Please be aware that it is a poster though, so images are vital.
