

Progression to A Level Physics at Prior Pursglove College

'Headstart to Physics' the CGP book is currently free via Amazon's online Kindle app so this is a good place to start- there are questions at the end of each page to check your understanding

The website 'myheplus.com' has an interesting section on Physics topics to look at and if you are thinking of studying Physics or engineering at Uni then you might like to try one of the sections on there

Isaac Physics is also a really good website to use for Physics. It allows you to work through problems online, it checks your answers and gives clues if you get stuck

Online you can also access things like Khan academy or TED talks if you want to broaden your understanding and explore links to the real world
